Amendments to the Abstract:

Please replace the abstract with the following:

~~The present invention is directed to a method~~ **Methods** and ~~an apparatus~~ **apparatuses are disclosed** for storing ~~the~~ digital broadcasting channels in ~~the~~ **a** channel list including ~~those~~ **both channels** for which the receiving environment is **stable or** not stable ~~as well as those for which the receiving environment is stable~~. In one embodiment, a digital broadcasting receiving apparatus for receiving a broadcasting signal ~~comprises~~ **may include** a tuner unit configured to extract a signal of a desired physical channel from an input signal, and a first judging unit configured to judge whether or not the **extracted** signal ~~extracted by the tuner unit~~ includes a digital broadcasting signal. A program information obtaining unit ~~is~~ **may be** configured to extract ~~the~~ program information included in the digital broadcasting signal from the **extracted** signal ~~extracted by the tuner unit and processed by the first judging unit~~, if the program information included in the digital broadcasting signal can be extracted, when it is judged in the first judging unit that the **extracted** signal ~~extracted by the tuner unit~~ includes the digital broadcasting signal. A memory unit ~~is~~ **may be** configured to store ~~a~~ **the** judgment result ~~in the first judging unit~~ and the program information ~~of the digital broadcasting signal obtained by the program information obtaining unit~~.
